**Subject: DuPont Laporte Incident Update**

November 18, 2014:

The OSC coordinated with DuPont on the process to remove the remaining methyl mercaptan in the reactor piping. The blockage in the piping has not been identified. The process plan will be implemented November 19th.

The Chemical Safety Board (CSB) is onsite investigating the incident.

The EPA OSC will remain onsite until air monitoring and sampling show safe levels for entry by facility personnel.
